

KNIGHT ADAPTER HEAD SYSTEM

Economical Open-Gravity Filtration System

The snap-on filter bag plus adapter head system for open-gravity filtration is superior in many ways to the tie-on system especially since there is not a large capital investment.

Easy to Use

This unique filtering system is easily installed.

It consists of an adapter head (celcon) designed to screw on to any standard pipe thread and uses a snap ring filter bag Which slips over the adapter for quick, secure bag attachment.

A filter bag (1/2 to 2000 microns) with a built-in flexible ring slips over the adapter head for quick and secure attachment. The snap ring holds the filter bag open so that 100% of the filter bag is used.
