

# The Widest Choice Of Tops And The Fastest Delivery Of Stock Liquid Filter Bags In The Industry

Since 1972 Knight Corporation has provided customers worldwide with the highest quality stock and custom filter bags. Innovation is an ongoing goal at Knight. Over the years we have expanded our technical expertise and improved our manufacturing techniques to keep pace with the changing demand of our diverse customer base. We can make any liquid filter bag, and provide any style top that you need for your specific application.

We offer a huge selection of stock liquid filter bags. Our stock bags are manufactured to fit all makes and standard size filter vessels currently used in the filtration industry. Carbon steel rings are standard on our stock bags, however we can provide any style top that you need.

Lifting handles, plastic and stainless steel rings, as well as, commercial stainless steel bands are available. We also offer several types of plastic tops. Our newly developed Sure-Seal™ plastic top was designed with a plastic handle for easy removal from the filter vessel. Our Sure-Seal™ is an excellent choice for P1, P2, P3, P4 and all other similarly sized filter vessels, even if the vessel had been designed for a

ring or plastic topped bag. All of our tops are standard items and we can ship your bags, with your choice of top, in a week or less, the same time frame as all of our filter bags.

As an excellent alternative for your low pressure, low gpm flow rate filtering applications, Knight offers plastic, carbon and stainless steel adapter heads. Available with different NPT fittings, the adapter head screws on to the end of a pipe and a filter bag secures to the head. This system provides a low cost solution to numerous filtration problems.

In addition to our filter bags and tops, we offer a complete line of filter vessels and baskets. For more information on any of our high quality products and our complete catalog, contact your local distributor or Knight Corporation.
